

## VOLUME CONTENTS

### NUMBER 1

- |  |    |  |
|--|----|--|
| Vi Q. Vuong and<br>Andrew J. Szeri                                   | 1  | Analytical integration and a numerical method for 1-D compressible flow with diffusive transport |
| Régis Martin and<br>Hervé Guillard                                   | 9  | A second order defect correction scheme for unsteady problems                                    |
| L. A. Catalano, P. De Palma,<br>M. Napolitano and<br>G. Pascazio     | 29 | A critical analysis of multi-dimensional upwinding for the Euler equations                       |
| S. K. Aggarwal, J. B. Yapo,<br>F. F. Grinstein and<br>K. Kailasanath | 39 | Numerical simulation of particle transport in planar shear layers                                |
| A. B. Ebian and<br>R. W. Bartholomew                                 | 61 | Design considerations for numerical filters used in vortex-in-cell algorithms                    |
| Tsun-Zee Mai and<br>Anthony M. J. Davis                              | 77 | Laminar pulsatile two-phase non-Newtonian flow through a pipe                                    |

### NUMBER 2

- |  |     |  |
|--|-----|--|
| V. S. Neary and<br>F. Sotiropoulos   | 95  | Numerical investigation of laminar flows through 90-degree diversions of rectangular cross-section |
| R. Ramamurti<br>and R. Löhner  | 119 | A parallel implicit incompressible flow solver using unstructured meshes                           |
| S. Z. Shuja and M. A. Habib  | 133 | Fluid flow and heat transfer characteristics in axisymmetric annular diffusers                     |
| Xiaobo Xue and<br>A. V. Tangborn   | 151 | Numerical simulations of mixing in a two-dimensional periodic flow with buoyancy                   |
| S. Menon, P.-K. Yeung<br>and W.-W. Kim   | 165 | Effect of subgrid models on the computed interscale energy transfer in isotropic turbulence        |
| Zi-Niu Wu  | 181 | Convergence study of an implicit multidomain approximation for the compressible Euler equations    |
| J. E. Borges, L. M. C. Gato<br>and R. M. R. J. Pereira                                   | 197 | Iterative use of a time-marching code for designing turbomachine blade rows                        |
| C. L. Rumsey,<br>M. D. Sanetrik,<br>R. T. Biedron,<br>N. D. Melson<br>and E. B. Parlette | 217 | Efficiency and accuracy of time-accurate turbulent Navier-Stokes computations                      |

### NUMBER 3

- |   |     |  |
|---|-----|--|
| <b>F. S. Lien</b><br>and <b>M. A. Leschziner</b>              | 237 | Second-moment closure for three-dimensional turbulent flow around and within complex geometries                            |
| <b>H.-L. Zhang</b><br>and <b>N. W. M. Ko</b>                  | 263 | Numerical analysis of incompressible flow over smooth and grooved circular cylinders                                       |
| <b>Jianfeng Zhang</b><br>and <b>C. Dalton</b>                 | 283 | Interactions of vortex-induced vibrations of a circular cylinder and a steady approach flow at a Reynolds number of 13,000 |
| <b>Xiaonan Wu</b><br>and <b>You-lan Zhu</b>                   | 295 | A highly accurate numerical method for two- and three-dimensional shock reflection problems                                |
| <b>D. W. Dusing</b><br>and <b>P. D. Orkwis</b>                | 319 | Numerical issues affecting vortex asymmetries computed with the conical Navier-Stokes equations                            |
| <b>E. A. Foumeny, D. B. Ingham</b><br>and <b>A. J. Walker</b> | 335 | Bifurcations of incompressible flow through plane symmetric channel expansions   |

### NUMBER 4

- |  |     |  |
|--|-----|--|
| <b>D. L. Darmofal</b>  | 353 | Comparisons of experimental and numerical results for axisymmetric vortex breakdown in pipes |
| <b>Xin Zhang</b> and<br><b>John A. Edwards</b>                                   | 373 | Analysis of unsteady supersonic cavity flow employing an adaptive meshing algorithm          |
| <b>P. He, M. Salcudean,</b><br><b>I. S. Gartshore</b><br>and <b>P. Nowak</b>     | 395 | Multigrid calculation of fluid flows in complex 3D geometries using curvilinear grids        |
| <b>P. Batten, D. M. Ingram,</b><br><b>R. Saunders</b> and<br><b>D. M. Causon</b> | 421 | A time-splitting approach to solving the Navier-Stokes equations                             |
| <b>G. Pascazio</b><br>and <b>M. Napolitano</b>                                   | 433 | A staggered-grid finite volume method for the vorticity-velocity equations                   |

### NUMBER 5

- |   |     |  |
|---|-----|--|
| <b>P. C. E. Jorgenson</b><br>and <b>R. H. Pletcher</b>  | 447 | An implicit numerical scheme for the simulation of internal viscous flow on unstructured grids |
| <b>V. B. Karamyshev,</b><br><b>V. M. Kovenya,</b><br><b>A. G. Sleptsov</b><br>and <b>S. G. Cherny</b> | 467 | Variational method of accelerating linear iterations and its applications                      |
| <b>D. Thévenin, F. Behrendt,</b><br><b>U. Maas, B. Przywara</b><br>and <b>J. Warnatz</b>              | 485 | Development of a parallel direct simulation code to investigate reactive flows                 |

- |  |     |   |
|--|-----|---|
| <b>Mou-Jin Zhang,<br/>M. J. Pomfret<br/>and C. M. Wong</b> | 497 | Three-dimensional viscous flow simulation in a back-swept centrifugal impeller at the design point        |
| <b>Hwan-Seok Choi<br/>and Je-Hyun Baek</b>                 | 509 | Computations of nonlinear wave interaction in shock-wave focusing process using finite volume TVD schemes |
| <b>J. S. Perez Guerrero<br/>and R. M. Cotta</b>            | 527 | Benchmark integral transform results for flow over a backward-facing step                                 |

I *Announcement*

### NUMBER 6

- |  |     |   |
|--|-----|---|
| <b>A. Karageorghis<br/>and Tao Tang</b>  | 541 | A spectral domain decomposition approach for steady Navier–Stokes problems in circular geometries |
| <b>J. H. Kwon and H. K. Jeong</b>        | 551 | Solution-adaptive grid generation for compressible flow   |
| <b>F. Grasso and M. Marini</b>           | 561 | Analysis of hypersonic shock-wave laminar boundary-layer interaction phenomena                    |
| <b>F. Olsson<br/>and N. A. Petersson</b> | 583 | Stability of interpolation on overlapping grids   |

I *Announcement*

### NUMBER 7

- |  |     |   |
|--|-----|---|
| <b>Q. X. Wang, K. S. Yeo,<br/>B. C. Khoo and K. Y. Lam</b>                         | 607 | Nonlinear interaction between gas bubble and free surface   |
| <b>T. S. Park and J. H. Kwon</b>   | 629 | An improved multistage time stepping for second-order upwind TVD schemes  |
| <b>D. Tafti</b>  | 647 | Comparison of some upwind-biased high-order formulations with a second-order central-difference scheme for time integration of the incompressible Navier–Stokes equations |
| <b>Feng Wen and J. Evans</b>   | 667 | Effect of particle inertia on the instability of a particle-laden flow  |
| <b>C. H. Crawford,<br/>C. Evangelinos,<br/>D. Newman<br/>and G. E. Karniadakis</b> | 677 | Parallel benchmarks of turbulence in complex geometries   |

## NUMBER 8

- |  |     |   |
|--|-----|---|
| <b>S. H. Kim</b>   | 699 | A comparison of numerical models for evaporative two-phase flow in a self-heated porous medium  |
| <b>J. Liu and W. Shyy</b>  | 719 | Assessment of grid interface treatments for multi-block incompressible viscous flow computation |
| <b>S. B. Brooks and A. Tozeren</b>   | 741 | Flow past an array of cells that are adherent to the bottom plate of a flow channel             |
| <b>K. F. C. Yiu, D. M. Greaves, S. Cruz, A. Saalehi and A. G. L. Borthwick</b> | 759 | Quadtree grid generation: information handling, boundary fitting and CFD applications           |
| <b>L. Hemmingsson</b>  | 771 | A domain decomposition method for almost incompressible flow                                    |
| <b>L. D. Dailey and R. H. Pletcher</b>   | 791 | Evaluation of multigrid acceleration for pre-conditioned time-accurate Navier-Stokes algorithms |

### I *Announcements*
